Balcony: No

Additional information

We offer to buy a new, modern apartment in a fully renovated building in the very center of Riga, in the SCHOOL HOUSE project. The house is located in a large, well-kept yard, which is separated from the active street by a closed entrance gate. Historically, the building housed a commercial school for girls, from which the project got its name School House.

The apartment is offered fully furnished and well-equipped, high-quality interior decoration - parquet floors, wooden windows, high-quality plumbing.

The house has been renovated in accordance with nowadays requirements - the foundations of the building have been strengthened and isolated, the facade has been restored, the roof covering has been replaced, all communications have been completely replaced. The building has city central heating with thermoregulation and an individual meter for each apartment, Schindler elevators are installed in the stairwells.

Great location with easy access to any part of the city - just a few minutes walk to Shopping center Origo, 10 minutes to the Old Town and the surrounding parks. All of the city's cafes and shops are close to your door.

Feel free to call or write to arrange a viewing or get additional information about the available apartments in the project.
